CNIM Systèmes Industriels

La Seyne sur Mer near Toulon

<https://cnim-systemes-industriels.com/en>

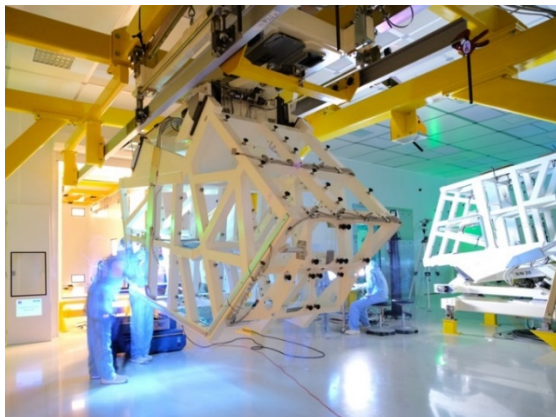

CNIM Systèmes Industriels is a French industrial engineering contractor and equipment manufacturer of international dimension, based in La Seyne-sur-Mer (Var, France) since 1856. We operate in the energy, defense and high-tech industry sectors.

CNIM Systèmes Industriels (CSI) designs, manufactures, controls, assembles and integrates highly technical parts for demanding markets such as space, semiconductors, nuclear and big science.

CNIM Industrial Systems (CSI) has recognised skills and know-how in precision machining of large components, manual and automatic welding of thick workpieces with minimal deformation, control and assembly for large and complex components.

CSI designs and manufactures complex parts in various materials (steel, stainless steel, alloys, Inconel, composite, polyurethane ..).

Our teams define and develop the appropriate technologies and processes that will guarantee performance, best cost solutions and operational safety of the parts manufactured for our customers.
